

Installation Guide

Developed and manufactured by ATP,
leaders in ASD pipe flushing solutions.

PurgePoint

An Innovative Purging Solution

INSTALLATION GUIDE

CAUTION - Prior to fitting this product ensure all ASD pipework beyond the PurgePoint is correctly bonded with the recommended cement glue.

Install the PurgePoint using the template and steps below:

1. Place the template under the existing pipework and align with the installation template.
2. Mark the wall with the four drilling positions as indicated on the template.
3. Mark, cut and remove the ASD pipework section as per the template cut line.
4. Prior to drilling ensure the exposed ASD pipework remains dust free.
5. Drill the four 5mm holes and fit the PurgePoint as oriented with the fixing anchors provided.
6. Glue and re-insert the existing ASD pipework into the Purge Point.

SERVICE & MAINTENANCE GUIDE

CAUTION - Due to operation and use of pressurised air it is advised that the correct eye protection is used.

Follow the steps below to perform pipe cleaning maintenance:

1. Unlock the padlock from the lockable handle.
2. Rotate in a clockwise direction to the closed position (off).
3. Lock the padlock in the closed position (off) to stop the flow of air to the ASD.
4. Remove the PurgePoint plug by pressing down on the outer collar.
5. Insert a 12mm push-fit standard air pipe from the air / nitrogen supply.
6. Purge the pipe with clean air or nitrogen to a maximum of 4Bar/60psi.
7. When completed, remove the purge pipe.
8. Re-insert the PurgePoint plug.
9. Unlock the padlock in the closed position (off).
10. Rotate in a counter-clockwise direction to the open position (on).
11. Lock the padlock to the lockable handle.

NOTE - Padlock and 12mm purge pipe is not provided.
